Plexus Open Toe 3 Degree - Small

The Open Toe Caudal Support Pads feature a patent pending, versatile design. They are available in small and medium sizes. Because these pads are designed to fit both fronts and hinds, farriers will find they need to carry less inventory. The unique diamond-shaped holes provide greater locking strength for FootPro DIM and Vettec Equi-Pak. The extra length and width at the toe and heels accommodates any shaped foot and shoe modifications. Designed to provide the greatest support, the pads include a large frog plate, with heel check relief, for easy application on contracted heels. The Frog plate stabilizers will keep its tip anchored in place - even in the harshest conditions. The wedge pad also features a 3-degree wedge for help in correcting negative palmar angles and tendon issues, while maintaining caudle support.

FEATURES

- Frog Plate stabilizers
- Pre-cut line at the toe
- Degree pads feature a 3-degree wedge
- Fits both fronts and hinds
- Large diamond-shaped holes
- Large frog plate
- Medium fits shoe sizes 1, 2 and 3
- Versatile patent pending design
- Two sizes: small and medium
- Small fits shoe sizes 00, 0 and 1

BENEFITS

- Frog plate stabilizer keeps tip anchored in place
- 3-degree wedge helps in correcting negative palmar angles and tendon issues, while maintaining caudal support
- Larger frog plate offers more support, with heel check relief for easy application on contracted heels
- Quick and easy application
- Extra length and width at toe and heels accommodate any shaped foot and shoe modifications
- Shapes that fit front or hind means less inventory needed
- Diamond-shaped holes provide greater locking strength for FootPro DIM and Vettec Equi-Pak
- Design provides optimum caudal support and laminitis treatment
- Pre-cut line offers easy cutout for hinds and elongated feet
